

Morrison Lamothe Inc is looking for a Product Development Technologist to assist with the development of new products and enhance existing products.

Skills Required:

- Must have 3-5 years experience in Product Development for the Food industry (preferably in the bakery or pastry enrobed means)
- Working knowledge of dough/pastry formulation
- Strong computer and math skills
- Able to work in a plant environment with varying temperatures
- Creative, organized and detailed oriented
- Enthusiastic individual-team player
- Ability to work well with minimum supervision
- External focus (to monitor trends, new ingredients etc)
- Strong time and project management skills
- Ability to communicate with all levels within the organization and with customer and suppliers

Job Description:

- Development of new products (bench, scale-up (1st production))
- Improvement of existing products
- Coordination and supervision of plant trials
- Documentation (costing, timeline, status, report etc)

Education:

BSc in Food Science

Other Considerations:

- Must be flexible to work shift work, travel between different locations, commuting distances
- Need to have own transportation

How to Apply:

Interested candidates please submit your resume by e-mail at hr@morrisonlamothe.com, or by fax to 416-255-1427.

Thank you
